

CHOICEPRINT™

EXTRA STIFFNESS AND RIGIDITY

ChoicePrint™ is an engineered, extruded mineral filled polypropylene sheet offering exceptional printability. ChoicePrint™ is specifically designed for applications that require excellent rigidity and stiffness with the durability and tear-resistance of synthetic paper. This specialized formula is available in white opaque with a matte/matte or gloss/matte finish. Create the items you need with Transcendia's broadest line of print media solutions for unique graphic applications including our newest ChoicePrint™.
