

# HIGH IMPACT POLYSTYRENE

GREATER FILM AVAILABILITY.  
SHORTER LEAD TIMES. CUSTOM OPTIONS.

Transcendia is now even better equipped to help you meet your customers' requests for styrene. We manufacture premium quality print-grade styrene products that ensure excellent ink receptivity for your flexo, offset, screen and digital printing processes.

## ENHANCED CAPABILITIES

- Two new high-speed extrusion lines dedicated to styrene production
- We now carry 50" x 100" sheets in standard thickness of 20pt, 30pt, 40pt and 60pt
- Ask us about custom sizes, gauges, colours and opacities available with small minimums and quick turnaround times

## STYRENE ADVANTAGES

- **Durable** – UV resistant, more stable than paper, will not warp or curl from moisture
- **Economical** – Low cost compared to other printable synthetic substrates
- **Flexible converting options** – Can be guillotine cut, die cut, punched and thermoformed
