

CLIMACOR® VCI CORROSION INHIBITOR FILM

A CLEAR VIEW ON CORROSION
PROTECTION WITH CLIMACOR®

Climacor® VCI corrosion inhibitor films are among the most effective solutions for corrosion protection in the metalworking industry.

SHAPES

- Single wound sheet/tubing/centre fold sheeting
- Flat and gusseted bags
- Case liner and covers
- Skin/stretch and shrink film
- Elasticated bags
- Lock-tip-bag/zipper bag
- Sealed shapes and special constructions
- Bubble films
- Special constructions to customer demand

BASIC INFORMATION

- Single sheet in width from 3" - 120"
- Flat widths from 6" - 124"
- Gusseted bags with a maximum girth of 144"
- Center-fold sheet up to a maximum 120"
- Sideweld bags to a depth of 100"
- Flat bags from 3" - infinite
- Bottom weld 6" - Infinite
- Film thickness .7 mil - 30mil
- Lower gauge and co-extruded films
- LDPE-versions or special combinations
- High-performance foils up to 1,000g dart-drop

FEATURES

- Single sheet sizes or multiple sheets on a perforated roll
- Printing with VCI and PE symbols
- Printing company logo for brand identity available
- Colorless or special colors available
- ESD design with antistatic agent

APPLICATIONS

- Multi-metallic
- Ferrous
- Non-ferrous
- Cast iron
- Copper

BENEFITS

- Short or long term protection (up to 2 years)
- Easy to apply
- Available in a wide range of shapes
- Adjustable to specific product, storage and transportation needs
- Nitrite and Amine FREE, safe for employees and customers
- Eliminates the need for oils and liquids, which leaves the metal clean, dry and ready for use
